

Heritage & Innovation in Textiles

OPTI-DRY

Reference tumble dryer for domestic laundering and drying

To meet the needs of the **modern textile laboratory**, the Opti-Dry has been developed as a standard reference drying unit for textile samples. The Opti-Dry is rapidly becoming a standard machine for many leading chain stores and their suppliers.

FORM

The latest version of the Opti-Dry has been further refined to provide the operator with a 'at a glance' indication of the test cycle stages on the graphic panel.

The temperature of the exhausted air is monitored and controlled to maintain the correct conditions. The process temperature and timing is indicated on the control panel using advanced digital instrumentation. The heating and cooling phases of the process are also indicated

FUNCTION

- Accurate time and temperature control in accordance with test requirements.
- Automatic and accurate timing of the drum rotation reversals.
- Audible alarm indicates when the machine has finished the test.
- Dwell times can be optimised to establish drying times for the specimens.

The Opti-Dry conforms
to International and
**major Retailer test
standards.** Opti-Dry
is preferred by many
leading independent
Textile Testing
laboratories.
